TECHNICAL SKILLS

Languages: SQL, Python (pandas, boto3, BeautifulSoup, curl_cffi), Bash

Data Engineering: ETL/ELT Pipelines, Data Modeling, dbt (Core), SQL Warehousing, JSON/REST

Cloud (AWS): Athena, S3, Glue Data Catalog, IAM (Least-Privilege)

Orchestration & CI/CD: GitHub Actions (scheduled workflows), Git

Analytics & BI: Evidence.dev (SQL + Markdown), Dashboard Development, Tableau

Other: Web Scrapping, Data Validation, Documentation, Version Control

PROJECT

RAM Market Monitor — Data Pipeline & Analytics Dashboard

Analytics Engineer (Portfolio-Project) • github.com/PaulHoss/ram-price-pipeline • June 2026 - Present

- Built an automated Python ingestion pipeline using requests and curl_cffi to scrape structured pricing data from JSON-LD sources, improving stability over HTML parsing.
- Engineered a daily-partitioned **Bronze** data lake on AWS S3 storing raw JSONL market observations.
- Created and registered an AWS **Glue Data Catalog** enabling serverless SQL querying via Athena.
- Developed a multi-layer **dbt** architecture (Silver → Gold) for cleaning, validating, and modeling product pricing data, including day-over-day deltas and generation-based rankings.
- Designed an interactive **Evidence.dev** dashboard hosted on GitHub Pages; automated the full workflow (Ingestion → dbt → Build → Deploy) using **GitHub Actions**.
- Pipeline processes daily market snapshots and maintains low-cost, serverless analytics infrastructure.

EXPERIENCE

Machinist - Multiple Employers

Price Machine Shop • Reliable EDM

2008 - 2019, Scott, LA

- Performed high-precision manual and CNC machining operations following strict engineering schematics.
- Conducted quality assurance inspections to verify compliance with tight tolerances.
- Documented job requirements, cycle times, and operational metrics to improve workflow efficiency.
- Supported EDM drilling operations and collaborated on process improvements.
- Brief partnership with owner on EDM Drill

Bus Driver

University of Louisiana @ Lafayette

September 2015 - October 2017, Lafayette, LA

- Safely and efficiently transported over 500 students daily across various campus and parking zones, maintaining strict time schedules.
- Dispatched operational drivers during on-call shuttle hours, coordinating route adjustments to respond to high-traffic demands.

Wireline Operator Assistant

Halliburton Energy Services

October 2011 - November 2012, New Iberia, LA

- Maintained, tested, and calibrated electrical/mechanical wireline tools for downhole logging.
- Assisted with rig-up/rig-down operations ensuring safe and efficient site setups.

Quality Coordinator

Cetco Oilfield Services

April 2010 - October 2011, Broussard, LA

- Helped develop and implement updated quality control and inventory tracking procedures to improve overall operational reliability and safety.

Mechanical Engineering Summer Intern

Halliburton Energy Services

June 2008 - August 2008, Houston, TX

- Systematically stress-tested a new internal database for calculation errors prior to a companywide rollout.
- Documented technical evaluation results and formally presented analytics findings.

EDUCATION

Bachelor of Science in Computer Science

Minor in Mathematics • University of Louisiana @ Lafayette • Lafayette, LA • 2022

Certifications

Google Data Analytics Professional Certification

Coursera • 2026
